## PREFACE

As part of a series giving final population figures from the 1945 Census of Newfoundland, this report shows Newfoundland's population by marital status and sex, and includes data to show the number of single, married, widowed and divorced persons of each sex classified by age groups. Earlier reports in this series gave the population of Newfoundland in 1945 for all districts, towns and settlements according to the following classifications in turn: (1) sex; (2) age groups; and (3) religious denominations. Other reports to follow in the "PN" series will deal with such subjects as literacy, ethnic origin, schooling, birthplace, etc.

Tables 11 and 12 of this report give figures for Newfoundland as a whole, the first showing marital status and sex at each census from 1901 to 1945 inclusive, and the second providing an additional breakdown by age groups for the Census of 1945. Tables 13, 14 and 15 present data for the 25 census districts, while Tables 16 and 17 show the number of single, married, widowed and divorced persons for individual towns and settlements.

The reports in this series represent final tabulated results from the Census of Population, Agriculture and Fisheries, taken by the Newfoundland Government in 1945. These tabulations have been carried out in the Dominion Bureau of Statistics at the request of Newfoundland. Further reports are being released to show classifications of the population by occupations, industry, income, etc., as well as data relating to households and families, and summary compilations of the Census of Agriculture and Fisheries.
